SECTION 1

EDUCATION : EDUCATE YOURSELF

Education is the passing or sharing of knowledge or experience from one person to another or from one group of people to another group of people.

Education is our daily living and its purpose is to prepare our minds to face the reality of life and to acknowledge life's purpose. Education begins at home, our parents teach us the basic principles of life and verily it is their right to instill discipline or punishment when we miss the line.

I respect everybody because my parents taught me about respect. I can cook almost every meal with good measurements because my parents taught me on how to be a better cook. Teacher is someone who educates you or who gives you lessons. Our role-models are our teachers it does not matter whether they teach us right or wrong things, good or bad things, if your role model is a thief there is a little doubt if you are not going to turn out a thief too. Our role- models

have got both positive and negative attitudes but its good to ignore the negative and focus on the positive attitude.

Bad role models are a big no because they mislead our generation, so for starters I would advice them to choose good role models if there are any.

Education is very much important and demands a full positive attention.

If you respect yourself you will find no difficulties in respecting other people. Respect is the result of good education, disrespect or disobedience is the result of learning from bad or negative things. Don't follow the teaching nor pay attention to the influence of a bad role model, you would rather have no-one.

Famous people are our biggest role models yet sometimes they make scandals.

The way you educate yourself depends on your choices you make and the decisions you take, so you must bear in mind that life is not a joke nor a competition but it is purpose.

Put God first in whatever you do, you will never go wrong unless you are wicked.
